Maoran Xu

Curriculum Vitae

Handan Rd. No.220
*Shanghai, China*
📞 *(+86)15821139576*
✉ *moranxu23@gmail.com*
🖥 *https://moran-xu.github.io*
DOB: Oct. 16, 1996

Education

Sep 2014 – Present
Fudan University, China, *Bachelors of Science*, Mathematics and Applied Mathematics*(Data Science & Technology)*.
Selected Course Work: Mathematical Analysis (I, II&III), Advanced Algebra (I&II), Fundamental Statistics (I&II), Statistical Computing, Introduction to Statistical Machine Learning, Data Visualization

Honors & Awards

Jan 2017
Meritorious Winner of Mathematical Contest In Modeling

Sep 2015& Sep 2016
Third Prize of the Scholarship for Outstanding Students at Fudan University

Sep 2014
First Prize of the Scholarship for Freshman Students at Fudan University

Research Experience

May 2017 – Present
Research Assistant, SUPERVISOR: NAN CAO AT TONGJI UNIVERSITY.
Developed an interactive situation awareness framework for security domain experts with machine learning tools. Made a successful submission to ACM SIGCHI, 2018 as the first author.

Selected Projects

Jul 2017
New York City Taxi Analysis, *Course Project for Large Scale distributed system*.
Used parallel computing tools on big scale datasets. Statistical and clustering methods were implemented on NYC open datasets to analyze driving patterns.

Jul 2017
Texas Hold'em Bot, *Course Project for Introduction to Artificial Intelligence*.
Designed a robot who played Hold'em Bot with human, adopted reinforcement learning strategy and kelly-criterion rule for investment.

Jul 2017
US Baby Name Analysis, *Course Project for Time Series Analysis*.
Applied typical time series model on baby name statistics over 20th century in U.S.A.. Made prediction and interesting relationship with big events on these data.

Jan 2017
Large-scale Video Classification, *Course Project for Statistical Machine Learning*.
Implemented neural network on large-scale video datasets for categorization. Implemented RBM and PCA for dimension reduction and utilized class relationships and feature fusion to gain higher accuracy.

Nov 2016
Quanquan App. , *Short-term Internship for ECTE China*.
Designed an algorithm for a educational application named Quanquan, which was used to. The application had already been released in both IOS and Android market.

Skills & Interests

Programming
PYTHON, R, MATLAB, JAVASCRIPT, C

Software
LaTeX, ADOBE PHOTOSHOP

Interests
PIANO, CLARINET, CHORAL SINGING (Chief Alto in Fudan Echo Singers)

Languages
MANDARIN (Native speaker), ENGLISH (Professional working proficiency), JAPANESE (Good)
